Abstract

Heterocyclically substituted benzoylureas, process for their preparation and their
5 use as pharmaceuticals

The invention relates to heterocyclically substituted benzoylureas and also to their
physiologically tolerated salts and physiologically functional derivatives.

10 Compounds are described of the formula I

I

15

where the radicals are defined as specified, and also their pharmaceutically
acceptable salts and processes for their preparation. The compounds are suitable,
for example, for treating type 2 diabetes.
